

## Coating – just as you like

---

At this year's EUHA congress, the German silicone specialists from DETAX presented 4 new silicone lacquers: bio coat, the first solvent-free 1-component lacquer, odourless no harmful vapours! dip coat, especially developed for dipping, no skin-formation. express coat, fast-drying, wiping-proof in just 8 min. supercoat nano, antibacterial sealing lacquer with nano-silver. Find your favourite on the DETAX Coating line!

Bioplast, the addition curing silicone for indirect fitting of soft-flexible earmoulds with high elastic 60 shore A – now also available in clear transparent. Bioplast earmoulds are long-term durable, extremely tear resistant, skin-friendly & biocompatible.

Fine impression quality does not necessarily imply a high price - that proves basic A. By using a new polymer, a less expensive formulation could be developed. The result is a reliable impression material that meets all demands, with a considerably better value than conventional A-silicones.

We thank all visitors at our booth for the lively dialogue and we look forward to seeing you again in 2008!
