

Hyaluronic acid gel 1.1%
Soft tissue regeneration for all implant situations

Perio booster

implantgel *perio*®

Hyaluron on high concentration

- high-molecular sodium hyaluronate concentration gel with 1,1 %
- ultrapure biotechnological production (non-animal origin)
- for the supportive management and care of soft tissue in implant situations
- particularly during the semi-permanent mounting phase of superstructures on implants
- forms a long-lasting muco-adhesive barrier and protective coating
- gel-like viscosity, stable, filmogenic
